BACKGROUND AND GEOGRAPHIC OVERVIEW:

San Juan County is one of the seven counties located in the Four Corners area that encompasses the Navajo Nation, a sovereign Nation that includes the States of Utah, New Mexico and Arizona. The total area of the Navajo Nation is 27,000 square miles, with a population of 180,000 residents residing on Navajo Nation tribal land, 168,000 are Navajo enrolled members, with the remaining being non-members who reside and work within the Navajo Nation. The area within Utah is 1.2 million acres, and a population of 5,500. The population surges during the tourist season throughout the Navajo Nation and especially the Monument Valley area. The area is visited by tourists from all over the United States and the world. The small airstrip located in Monument Valley is partially paved and has the remainder natural surface in which take-offs and landings come in from the same direction. Historically, this airstrip has had the second highest number of passengers of any location in the State other than the Salt Lake City International Airport. Passengers are brought to the area via Scenic Airlines from Page, Arizona and Las Vegas, Nevada.

The Navajo Nation is served by Navajo Frontier Communications with its headquarters located in Fort Defiance, Arizona. In the Utah portion of this service, 559 hard lines are identified by the Utah State Tax Commission report on E911 surcharges. The total hard lines have been identified county wide as 3877 and a total of radio lines of 2400. The total number of hard lines for the Utah Portion of the Navajo Nation may range from 350-400 lines. See attachment B-1.

In addition, there is limited cellular services provided within the Navajo Nation, the main provider of these services is Cellular One and its franchise. Cellular One is providing many of these services through a contract with the U.S. Federal Government to provide subsidized telephone services to the residents of the Navajo Nation and in-lieu of hard line services. There are many cellular providers that provide service to the area borders of the Navajo Nation. Utah telephone prefixes are provided for the Aneth and Montezuma Creek area (435-651), Halchita, a small community located near Mexican Hat (435-739), and Monument Valley and Oljato areas which extends into Arizona (435-727). Arizona telephone prefixes are provided for Navajo Mountain (928-672), Dennahtoso (928-658), Teec Nos Pos (928-656), and Red Mesa (928-656). The majority of these prefix areas serve residents in the State of Arizona.

The Navajo Nation Government is composed on a three tier system including a Legislative, Judicial and Executive Branch with local governments called Chapters. There are 110 chapters with 7 located within San Juan County, Utah. Of the seven chapters, only one is completely located within the County (Aneth Chapter). The other 6 chapters are located within San Juan County and the State of Utah, and the State of Arizona and their counties (Red Mesa, Mexican Water, Teec Nos Pos, Oljato, Dennahtoso, and Navajo Mountain Chapters). Law Enforcement is provided by the Navajo Nation Police Department (NNPD) and the Federal Bureau of Investigation (FBI). The NNPD has jurisdiction over members of the Navajo Nation and misdemeanor crimes, with the FBI having jurisdiction over felony crimes. The Utah portion of the

Navajo Nation is divided into two different administrative areas for NNPD with offices and dispatch centers located in Shiprock, New Mexico and Kayenta, Arizona. The San Juan County Sheriff's Office and the Utah Highway Patrol provide law enforcement services over non-members of the Navajo Nation.

Fire, Rescue and Emergency Medical Services for the San Juan County, Utah area are provided by the County. Ambulances are located in Montezuma Creek and Bluff with Emergency Medical First Responders located in Monument Valley. Ambulance service is provided by the Navajo Nation EMS and is located in Kayenta, Arizona; Teec Nos Pos, Arizona; and Shiprock, New Mexico. Fire and Rescue units are located in Montezuma Creek, Bluff, Mexican Hat and Monument Valley. Mutual agreements are in place with the Kayenta, Arizona Fire Department and the Aneth BIA Community School Fire Department. A mutual aid agreement is pending with the Navajo Nation Fire Department.

The Navajo Nation Police Department is the primary PSAP for this area transferring calls to adjacent States, Counties, Cities and other first response agencies as required. Currently, there is limited 911 service in areas around Window Rock, Arizona. In the San Juan County, Utah portion of the Navajo Nation, there is no 911 service. The County has provided an 800 number which comes into the San Juan County Dispatch Center over an administrative line. A call forwarding option has been placed on the 911 number the calls being forwarded to the Kayenta, Arizona or Shiprock, New Mexico NNPD Dispatch Office. Cellular 911 calls are answered by a number of PSAPs located off and on the Navajo Nation.

Mapping the Utah Portion of the Navajo Nation was first started by a joint project of the Utah Navajo Trust Fund (UNTF), The Utah Geographic Resource Center (UGRC) and San Juan County. In 2003-2004 in connection with the County's efforts to map all of the county roads, the roads, residents, including pictures of the buildings, were mapped using GPS and GIS technology. In 2005, the Utah Navajo Revitalization Fund (UNRF) also financially participated in an effort to update the information originally obtained including new construction. This effort will be completed in December of 2005 and will be annually assessed and updated.

The State of Utah and San Juan County, Utah are providing technical support for the NNPD's technology efforts. Through a series of grants, the Navajo Nation has placed satellite internet services into each of the 110 chapters, including computers for residents and WIFI service into the surrounding area. The NNPD has installed laptop computers into the law enforcement officer's cars and they are able to receive 900 mgz data services as well as being able to connect into the Nation's system using the hotspots located at the Chapters. The State of Utah specifically will provide training and support for the Nation to utilize NCIC information through the Utah's system and provide training for the field officers, dispatchers and administrative staff, ultimately assisting the Nation into obtaining their own equipment and maintaining the system.

FUTURE E-911 SERVICES:

The Navajo Nation has requested technical assistance from the National Emergency Number Association (NENA) in designing and developing a future E-911 system to serve the residents of the Navajo Nation. NENA has agreed to provide this technical assistance and has contracted with Ron Whinery and Associates of Atlanta, Georgia. Mr. Whinery has been in the Navajo Nation area several years ago providing similar type of services for both the Navajo and Hopi Nations.

The Navajo Nation held an internal meeting in October of this year to begin its development of an E-911 system (see Attachment A). This meeting was very productive and the next meeting involving internal and external partners has been scheduled for the first part of January 2006 to be held in Window Rock, Arizona.

The State of Arizona collects the 911 surcharges and then distributes them to PSAP throughout the State including Native American Nation and Reservations. This is the same process for the State of New Mexico. The State of Arizona requires an application detailing the proposed E-911 service to be submitted and approved by the State prior to funding. A requirement of this application and approval is that at least 70% of the area be addressed. The Navajo Nation will have to meet these requirements in order to receive funding from the State of Arizona. The State of New Mexico will provide funding when the State of Arizona approves the Navajo Nation request.

San Juan County, Utah has agreed to provide the GPS/GIS mapping information to the Navajo Nation that it has collected and will assist with the addressing and will work with its partners to keep this information updated on an annual basis. The provider of electrical, water, natural gas, and sewer services by the Navajo Nation, the Navajo Tribal Utility Authority (NTUA) has a great deal of GPS data that can and should be able to be integrated with the San Juan County, Utah information. Additionally, Utah Power and Light (UP&L) has similar information on the area it provides electrical service on the eastern side of the Utah portion of the Navajo Nation.

Through the planning process, the Navajo Nation will determine the locations of future PSAPs and number of dispatch positions that will be needed. Current locations if continued at the Shiprock, New Mexico and Kayenta, Arizona would require at least four dispatch positions. If consolidation of the PSAPs occurs throughout the Navajo Nation, it is anticipated that less dispatcher positions would be needed for the entire system.

It is anticipated that this planning process will take a minimum of six months to one year to complete, which the majority of the effort will undertake the addressing requirements. Equipment procurement, installation and training should take place in 2007 with operations starting during the later part of 2007.

BUDGET REQUEST:

San Juan County, Utah is requesting that the Utah State E-911 Committee fund two dispatcher positions with the future Navajo Nation E-911 system. This request would be such that the funds be available at a future time when the total system be implemented, anticipated to be in 2007. This action along with providing the available addressing information and data that is available will send Utah's commitment to the Navajo Nation of this needed system.

UTAH E-911 COMMITTEE FUNDING**\$150,000.00**

San Juan County, Utah; Utah Navajo Revitalization Fund; Utah Navajo Trust Fund; Utah Geographic Resource Center; Utah Department of Public Safety; Utah ITS; and other County and State Resources to Provide staff, travel, training and other expenses related to the Navajo Nation's overall Public Safety Communication System, including E-911.

RE: Navajo Nation Rural Addressing and Enhanced 9-1-1

Dear Chairperson Stevens:

The Government Services Committee of the Navajo Nation Council approved a resolution supporting the "development of an integrated Navajo Nation Wide 911 Emergency Communication Service System." The Division Directors have committed their internal support and organizational resources to help move forward with rural addressing and the implementation of Enhanced 9-1-1.

A *Navajo Nation Enhanced 9-1-1 Task Force* has been appointed to "plan, secure facilities, equip, staff, train and successfully implement, operate and maintain a fully integrated Navajo Nation enhanced 9-1-1 system by 2Q 2009." The Task Force will be conducting its' first internal workshop meeting October 25-26 to organize and kick-off the project. Within the task force, nine (9) work groups have been chartered to address a complement of agendas and coordinate with each other.

However, we recognize that this can not be accomplished with internal resources alone. Interdependencies and coordination with others outside the Navajo Nation will be crucial to our success. Outside experience and expertise are required for guidance, plus funding to get started.

We would like to start moving forward with rural addressing. Several Navajo Nation Chapters are located in southeastern Utah's San Juan County, which offers the opportunity to work with your personnel that have already gained experience with rural addressing and the associated processes. Working together should help jump-start our efforts and validate the processes as we start to use them.

Navajo Nation Rural Addressing and Enhanced 9-1-1

- 2 -

October 7, 2005

We would like to enter into discussions with San Juan County, in which the Navajo Nation has a presence, to establish an MOA that will govern the roles and responsibilities of the parties as we move forward with rural addressing.

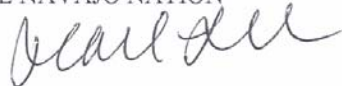

Any suggestions that you might have will be welcomed.

We look forward to working with San Juan County to complete rural addressing on the Navajo Nation and successfully implement enhanced 9-1-1.

If there are any questions or comments, I can be contacted at 928.871.7748.

Sincerely,

THE NAVAJO NATION

RE: Navajo Nation Rural Addressing and Enhanced 9-1-1

Dear Ms. Lee:

I am in receipt of your letter dated October 07, 2005 regarding the Navajo Nation's proposal to move forward with rural addressing and the implementation of Enhanced 9-1-1 for the Navajo Nation which a portion is within the borders of San Juan County, Utah.

San Juan County, in connection with the Utah Navajo Trust Fund and the Utah's Automated Geographic Reference Center (AGRC) has used GPS systems to identify all of the residences located in the Utah portion of the Navajo Nation. In fact, crews are in the field at the present time updating this information. At the present time, addresses have not been assigned to these residences. I also had the opportunity to discuss our data with Mr. David Stephens, representing OnSat, a contractor assisting the Navajo Nation in several communications and data projects and reviewed with him the information that we would have available for the Navajo Nation to use in the addressing portion of this project.

Please provide me regular updates of your progress including minutes and handouts and I will forward these onto our other partners in this project. We look forward to providing your agency with available information to assist in this implementation of E911 on the Navajo Nation.

Very truly,

Rick M. Bailey, Director
San Juan County Fire and Emergency Services

RE: Invitation - Navajo Nation Enhanced 9-1-1 Task Force Meeting January 10-11, 2006

Dear Mr. Bailey:

The Government Services Committee of the Navajo Nation Council approved a resolution supporting the "development of an integrated Navajo Nation Wide 911 Emergency Communication Service System." The Executive Division Directors, as a group, have pledged their continued support and shared organizational resources to staff, plan and successfully implement rural addressing and Enhanced 9-1-1 Navajo Nation wide.

A *Navajo Nation Enhanced 9-1-1 Task Force* has been assembled to "plan, secure facilities, equip, staff, train and successfully implement, operate and maintain a fully integrated Navajo Nation enhanced 9-1-1 system by 2Q 2009." The Task Force conducted their first internal workshop meeting October 25-26 to organize and kick-off the project. Within the task force, nine (9) work groups have been chartered to address a complement of agendas and coordinate with each other.

However, we recognize that this can not be accomplished with internal resources alone. Interdependencies and coordination with others outside the Navajo Nation will be crucial to our success. Outside experience and expertise are required for guidance, plus funding to get started.

Therefore, we wanted to extend invitations to outside organizations and individuals we will be working collaboratively with as the planning and implementation phases of rural addressing and the move to enhanced 9-1-1 get started. The next meeting is planned January 10-11, 2006, in Window Rock, AZ at the Navajo Nation Museum.

ATTACHMENT K

service; but with the advent of wireless and other new technologies, and homeland security concerns, it must become a more unified, national system that meets higher standards.

Because funding for 9-1-1 services varies tremendously across the country, the issues surrounding financing and cost recovery are a major challenge. With support from the Monitor Group, a nationally recognized research firm, the policy and finance teams worked on:

- The deployment of customized technical assistance and support directly to states and localities, as described below;
- An examination of various methodologies and mechanisms for financing 9-1-1;
- The engagement of third party leaders, CEO's and government executives in addressing these issues; and
- The building of consensus on the most effective approaches to wireless enhanced 9-1-1, as well as the next generation of 9-1-1.

With regard to technical assistance, SWAT supplemented its staff capacity through a contract with Ron Whinery and Associates. With Mr. Whinery's assistance, SWAT has provided specific assistance to states and localities including Hawaii, Idaho, Nevada, New Mexico, Oklahoma, Pennsylvania, South Dakota, Utah, West Virginia, Wyoming, the Navajo Nation and the Hopi Tribe. There is a critical need for this kind of coordination and help, and this effort will be continued as resources allow.

E9-1-1 Stakeholders' Initiative

Perhaps the best-known project undertaken by SWAT was the E9-1-1 Stakeholders Initiative, which brought together leading representatives of all the partners involved in the 9-1-1 system, and was facilitated by the Monitor Group, a high-level research firm based in Cambridge, Mass. The stakeholders identified six public policy criteria for evaluating policy options, including ubiquity, efficient use of scarce resources, fairness to all parties, timely deployment, future proofing, and maintenance of service quality. Building on these areas of consensus, the Monitor Group facilitated an exploration of ways to improve the public policy framework of the 9-1-1 system, including a great deal of supporting analysis. The Monitor Group's study will be published and provided to you soon.

While the results of the Stakeholder Initiative are extremely important, one of the greatest benefits of the effort was the opportunity it provided for stakeholders to engage in a closer dialogue, to understand (perhaps for the first time) each others' perspective, and to explore together the intricacies and challenges we all face in implementing our critical public safety service. That kind of proactive dialogue was long overdue and will have lasting effects as we necessarily continue to work together to implement this critical public safety service, both for wireless and emerging technologies.

Concluding Thoughts

In the weeks and months to come, all of these work products will be distributed to the entire NENA membership and will be posted on our Web site. We'll also be engaged in follow-up communications with the 9-1-1 system stakeholders, policy makers, and the media, sharing the
